a message from...

THE PUPMN TEAM

As 2025 comes to a close, it's exciting and rewarding to look back at all we achieved this year!

But we wouldn't have been able to achieve any of this without your support! A HUGE thank you to all our fosters, volunteers, donors, adopters, partners, and supporters of all kinds!! No matter how little it may seem at the time, every level of support matters and is appreciated!

A shout out to our amazing partners that have hosted our adoption events- Pet Evolution, Roseville Petco, Highland Petco, Insight Brewery, and Arbeiter Brewery! Nearly half of our dogs this year were adopted as a result of these partnerships! Thank you also to our veterinary partners, Mendakota Animal Hospital and Oahe Animal Hospital, who we work closely with to ensure every pup gets the high-quality veterinary care they deserve.

We can't wait to see what 2026 brings and want to wish everyone a happy new years!!

the story of **ANGELO**

One of the most memorable pups we rescued this year was Angelo, a sweet border collie mix puppy who came to us with a vision impairment and neurological condition that made it difficult for him to stand, walk, and see.

Angelo struggled a lot at first with finding his food and being able to go up and down even a few stairs. But with the patience, coaching, and love from his foster, he quickly learned and began thriving! He became a volunteer favorite because of his affectionate, calm nature and excitement for life!

the story of **ANGELO**

All Angelo needed now was a home of his own and adopters who were willing to continue to guide him through the world and understand his needs. Soon enough Angelo, now named Murphy, found that perfect, loving home and now spends his days happily playing in the yard with his brother, Bailey!

We are so proud of this little kiddo for coming so far and winning the hearts of so many along the way! His story answers the age old question- is love blind? At least in Angelo's case, it sure is!

South Dakota

WELLNESS CLINICS

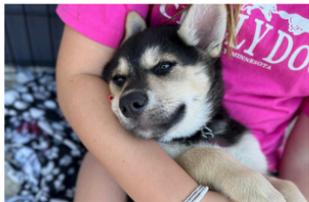

Every year, Pooches United with People works with our partners to host free dog wellness clinics for South Dakota Reservation communities which lack access to veterinary care. Every dog gets up-to-date on vaccinations, flea/tick or mange treatment as needed and a collar, leash, and food as needed.

South Dakota **WELLNESS CLINICS**

This year we partnered with Sitting Bull College to provide Veterinary Assistant students with hands-on experience! They worked beside PUP at these clinics, gaining experience handling pets, giving vaccinations, record keeping, and interacting with the pet's owners. We have loved our partnership with Sitting Bull College and can't wait to work with them for many years to come!
